This diagram illustrates the fifth step of the assembly process. It shows the upper rail being attached to the side rails. The side rails are labeled 'E1' and 'E2'. The upper rail is labeled 'B'. The diagram shows the upper rail being moved upwards, indicated by a large upward arrow. Two callouts show the correct orientation of the upper rail, with a padlock icon indicating that the rail should be locked into place. The side rails are shown with a 'D' label and a 'B' label. The upper rail is shown with a 'B' label. The diagram shows the upper rail being moved upwards, indicated by a large upward arrow. Two callouts show the correct orientation of the upper rail, with a padlock icon indicating that the rail should be locked into place.

Diagram 6 illustrates the step of attaching the handle to the door pull. A circular callout shows a close-up of the handle being inserted into the end of the pull, with a downward arrow indicating the direction of movement. The handle is labeled 'J1' and the pull is labeled 'J2'.
